

Visual Dashboard Prototype

A presentation-ready layout based on the uploaded KPI report

Four planned dashboards

- 1. Hospital Overview
- 2. Patient Flow
- 3. Department Analysis
- 4. Resource Utilization

1. Hospital Overview

All-hospital snapshot

Total Cases

500

IP Admissions

141

IP Admission Rate

28.2%

Average LOS

1.28

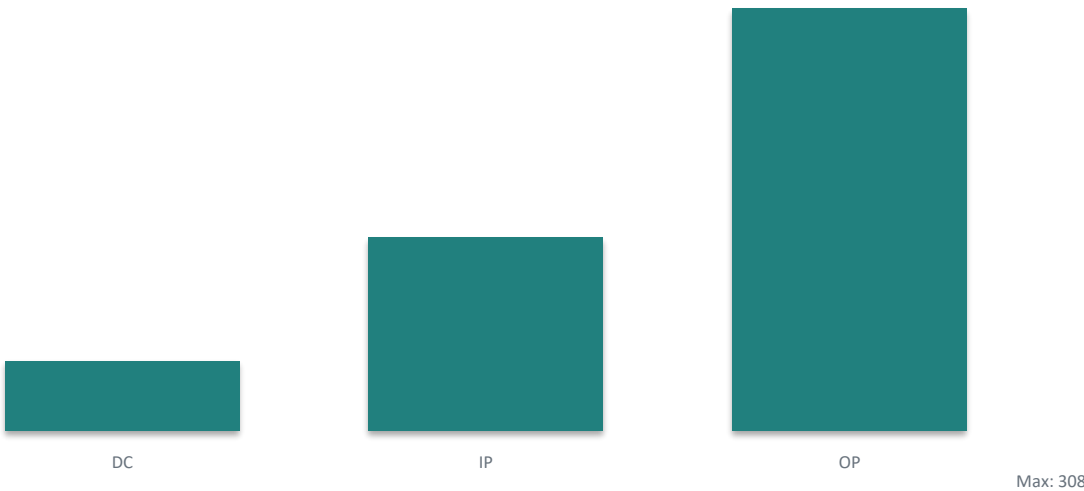

Total Revenue

₹8.52M

Monthly Cases Trend

Cases by Case Type

Filters

Month | Case Type | Gender | Specialty

Key insight

IP cases are fewer than OP cases but generate most revenue.

2. Patient Flow

Admissions, cases and LOS

Total Cases

500

Admissions

141

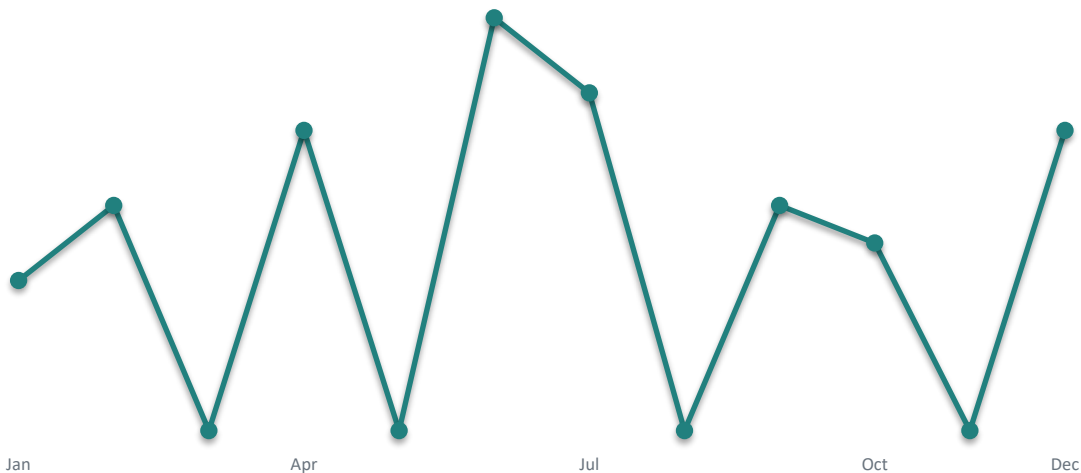

Average IP LOS

4.19

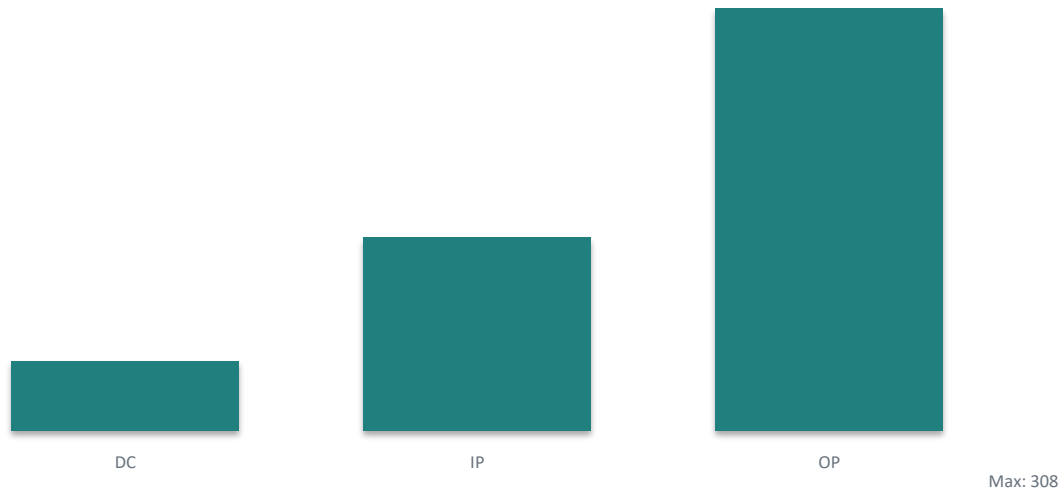

Average LOS

1.28

Monthly Admissions

Patient Type Distribution

Filters

Month | Case Type | Gender | Severity

Planned chart

Average LOS by Month → line chart

3. Department Analysis

Specialty-level performance

Top Cases Specialty

General Surgery

Top Cases

70

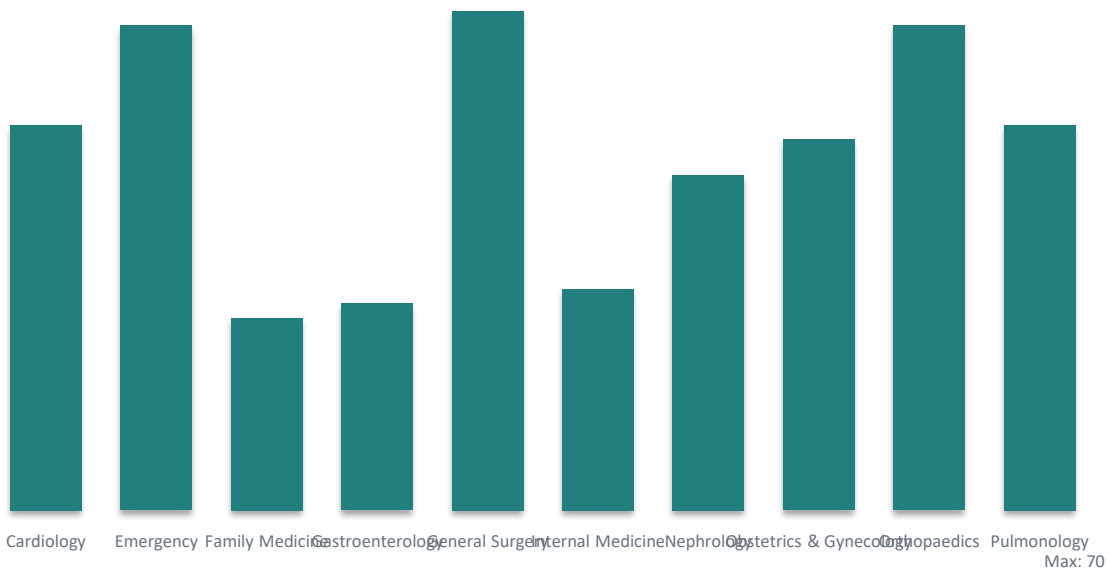

Top Revenue Specialty

General Surgery

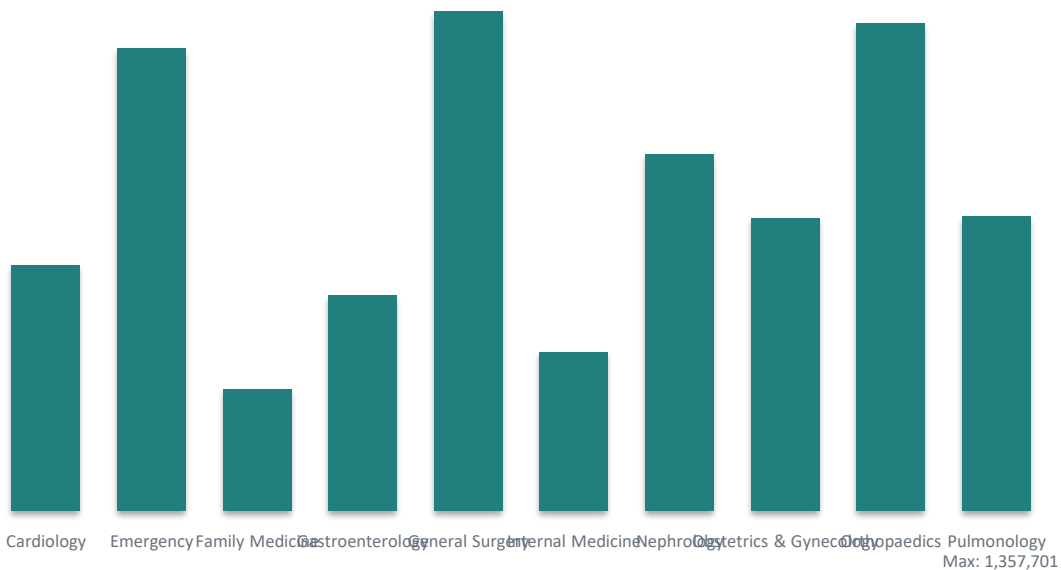

Top Revenue

₹1.36M

Cases by Specialty

Revenue by Specialty

Filters

Month | Specialty | Doctor Type | Payer

Planned chart

Average LOS by Specialty

4. Resource Utilization

Planned resource-focused view

Total Doctors

—

Active Doctors

405

Inactive Doctors

95

Total Cases

500

Doctor Status

ACTIVE

405

INACTIVE

95

Doctor Type / Case Load

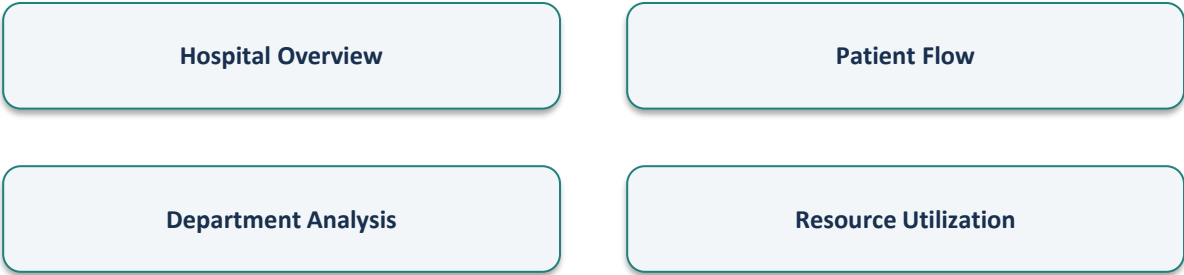

Specialist | Consultant | GP

Planned charts: Cases by Doctor Type, Revenue by Doctor Type

Filters

Month | Doctor Type | Doctor Status | Specialty

Navigation

Dashboard filters

- Month / Date
- Gender
- Severity
- Doctor Status
- Case Type
- Specialty
- Doctor Type
- Payer / Insurance

Build order

1. Finalize storyboard → 2. Build worksheets/charts → 3. Assemble dashboards → 4. Test navigation & filters

Note: The uploaded report does not contain a total doctor count, so that KPI is left blank rather than invented.
