

MedTrack_DV — Dashboard Guide

Project: MedTrack_DV — Hospital Operations & Patient Analytics Dashboard (Group 2)

Mentor: Pathina Likhita

1. Overview

The MedTrack_DV Tableau workbook contains four integrated dashboards:

1. Hospital Overview
2. Patient Flow
3. Department Analytics
4. Resource Utilization

The dashboards provide different levels of healthcare operational analysis.

2. Hospital Overview

Purpose

The Hospital Overview dashboard provides a high-level summary of hospital performance and patient outcomes.

KPI Cards

- Total Patients
- Average LOS
- Occupancy Rate
- Readmission Rate
- Satisfaction Score

Tableau Worksheets

- KPI - Total Patients
- KPI - Average LOS
- KPI – Occupancy Rate
- KPI - Readmission Rate
- KPI - Satisfaction Score
- Admission Trends Chart

- Occupancy Rate Trend
- Readmission Trend
- Department Distribution
- Age Group Distribution
- Length of Stay

Analysis

Admission Trends Chart

Shows admission activity over time.

Occupancy Rate Trend

Shows changes in hospital occupancy over time.

Readmission Trend

Shows changes in readmission over time.

Department Distribution

Shows patient or admission distribution across departments.

Age Group Distribution

Shows patient distribution across age groups.

Length of Stay

Provides patient length-of-stay analysis.

3. Patient Flow

Purpose

The Patient Flow dashboard analyzes patient admissions, waiting time, admission status, admission shifts and length of stay.

KPI Cards

- Total Patients
- Average Wait Time
- Patients Waiting >45 Min
- Average LOS

Tableau Worksheets

- KPI - Total Patients
- KPI 3 — Average Wait Time
- KPI 4 — Patients Waiting >45 Min
- KPI - Average LOS
- Patient Admissions Trend
- Patient Admission Status
- Patients by Wait Time Category
- Average LOS by Department
- Admission by shift
- Patient Flow chart

Analysis

Patient Admissions Trend

Shows patient admission volume over time.

Patient Admission Status

Analyzes patients according to admission status.

Patients by Wait Time Category

Groups patients according to waiting-time categories.

Average LOS by Department

Compares average length of stay between departments.

Admission by Shift

Analyzes admission volume by admission shift.

Patient Flow Chart

Provides an overall view of patient movement and flow.

4. Department Analytics

Purpose

The Department Analytics dashboard compares operational performance across hospital departments.

KPI Cards

- KPI #2
- Average Wait Time
- Average LOS
- Readmission Rate
- Department Efficiency Score

Tableau Worksheets

- KPI #2
- KPI 3 — Average Wait Time
- KPI - Average LOS
- KPI - Readmission Rate
- Department Efficiency Score
- Admissions by Department
- Average Wait Time by Department
- Readmission Rate by Department
- Department Performance
- Department Efficiency
- Department Distribution

Departments

The workbook contains departments including:

- Cardiology
- Orthopedics
- Neurology
- Renal
- General Practice
- Physiotherapy
- Gastroenterology

Analysis

Admissions by Department

Compares patient or admission volume between departments.

Average Wait Time by Department

Compares waiting time across departments.

Readmission Rate by Department

Compares readmission levels between departments.

Department Performance

Provides department-level performance comparison.

Department Efficiency

Compares department efficiency scores.

Department Distribution

Shows patient distribution across departments.

5. Resource Utilization

Purpose

The Resource Utilization dashboard focuses on hospital capacity, bed utilization, patient volume and department efficiency.

KPI Cards

- Total Beds
- Occupied Beds
- Bed Utilization Rate
- Average LOS
- Average Wait Time

Tableau Worksheets

- KPI 1 — Total Beds
- KPI 2 — Occupied Beds
- KPI 5 — Bed Utilization Rate
- KPI - Average LOS
- KPI 3 — Average Wait Time
- Patient volume by department
- Resource Utilization chart
- Utilization trend

- Occupancy & bed utilization
- Bed occupancy by department
- Department Efficiency

Analysis

Patient Volume by Department

Shows patient volume across departments.

Resource Utilization Chart

Provides an overview of hospital resource utilization.

Utilization Trend

Shows utilization changes over time.

Occupancy & Bed Utilization

Analyzes occupancy and bed utilization.

Bed Occupancy by Department

Compares bed occupancy across departments.

Department Efficiency

Compares department efficiency.

6. Dashboard Navigation

The workbook contains navigation elements connecting the four dashboard views.

Recommended analytical flow:

```
Hospital Overview
↓
Patient Flow
↓
Department Analytics
↓
Resource Utilization
```
